MORE THAN JUST A BLOWGUN

Air Boy; your guarantee for a
leak-free blowgun

AIR BOY SILENT BLOWGUN

- Low noise blowgun
- non-obstructive safety nozzle
- Silent Air Boy is especially designed to keep the noise level below 79 dB according to regulations
- The airflow is easily adjusted with the trigger
- Produced in a very hardwearing Acetal plastic
- Ergonomically correct design reduces hand fatigue

The nozzle works as a built in silencer combined with an effective safety function, as the design of the nozzle ensures that the airflow cannot be blocked. If the nozzle is blocked the outlet pressure will drop to below 2 bar (30 psi).

JET AIR BOY BLOWGUN

- The Jet Air Boy Blowgun combines all the best features, such as high blowing force, low noise - and it is equipped with a non-obstructive safety nozzle
- Fulfils OSHA requirements
- The Jet Air nozzle reduces the air consumption with 20% - 55%
- Easily trigger adjustment of airflow
- Produced in a very hardwearing Acetal plastic

The high blowing force supplied by the Jet Air Boy Blowgun, is an important advantage, since most silent blowguns on the market normally are characterized by a very low blowing force.

AIR BOY BY-PASS BLOWGUN

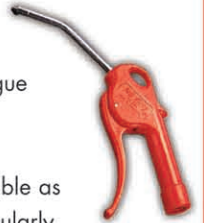

- The Air Boy Blowgun with ByPass nozzle generated 100% larger air volume due to the VENTURI EFFECT
- Equipped with a non-obstructive safety nozzle
- A blowgun with a very high blowing force
- The airflow is easily adjusted with the trigger
- Ergonomically correct designed

The Air Boy blowgun with ByPass nozzle is constructed for incorporation of a venturi effect, which increases the airflow by 100%. The ByPass nozzle also has a safety function, which prevents the airflow from becoming blocked if held against the skin. If the nozzle is blocked the outlet pressure will drop to under 2 bar (30 p.si.).

AIR BOY STANDARD BLOWGUN

- The Air Boy Standard blowgun offers a very high blowing force
- Ergonomically correct design reduces hand fatigue
- The airflow is easily adjusted with the trigger
- Produced in a very hardwearing Acetal plastic
- Protective shields and rubber nozzles are available as an accessory. Air Boy rubber nozzles are particularly suitable for cleaning items with a delicate surface

Air Boy blowguns represent the best Danish quality and are characterised by being a very hardwearing and long lasting product.

SUPER SILENT AIR BOY

- Extremely high blowing force and equipped with a non-obstructive integrated safety nozzle
- Produced in a very hardwearing Acetal plastic
- Easily trigger adjustment of airflow
- Ergonomically correct design reduces hand fatigue
- The Super Silent Air Boy is equipped with a stainless steel pipe, as standard

The SUPER SILENT Air Boy represents all the best characteristics combined into one blowgun, such as low noise, safety feature and an extremely high blowing force.

AIR BOY SAFETY BLOWGUNS

- Equipped with a built-in reduction valve
- Ergonomically correct design reduces hand fatigue
- The airflow is easily adjusted with the trigger
- Produced in a very hardwearing Acetal plastic

The Safety Air Boy blowgun is fitted with a reduction valve inside the handle of the blowgun. Due to this construction, the outlet pressure is limited to 2 bar or 3, 5 bar, at inlet pressures between 4 bar to 16 bar.

SUPER AIR BOY BLOWGUN

- A safety blowgun with extreme high blowing force and a very low noise level
- Equipped with a NON-OBSTRUCTIVE integrated SAFETY NOZZLE
- Perfect for vertical applications
- The SUPER AIR BOY is produced in a very hard wearing POM /Acetal plastic
- Futuristic and economically correct design, with a grip making it practical for hanging up the product

The SUPER AIR BOY blowgun represents all the best characteristics combined in one blowgun, such as low noise, a non-obstructive safety nozzle and a very high blowing force - and it is developed in a REVOLUTIONARY ELEGANT DESIGN.

MAX For Service

MAX For Quality

MAX For Convenience

JWL CLEANING GUNS

- CORROSION-FREE
- A cleaning gun produced 100% in synthetic material
- Much easier and cleaner adjustment of nozzle for liquid spray
- The Air Boy handle offers a perfect handgrip
- The flow is easily adjusted with the trigger
- A strong and hardwearing product

The adjustable nozzle on the JWL cleaning gun, allows the user easily and quickly to spray cleaners and degreasing agents on various items - without having the often very aggressive liquids in contact with hands and fingers.

JWL BRAKE BLEEDERS

- The JWL Brake Bleeder enable one man to bleed the brake systems
- The bleeding of the brakes is preformed swiftly and easily
- When the Brake Bleeders handle is activated, a vacuum is created and the brake fluid is sucked into the container
- The fluid-flow is simply to adjust with the trigger
- JWL Brake Bleeder with refill system is available upon request

The JWL Brake bleeder with replenishment system automatically refills the brake system, with new and clean brake fluid, when the old brake fluid is sucked out.

JWL UNDERSEAL GUN

- CORROSION-FREE
- For both water based and ordinary liquids
- Very easy to mount and dismount container for anticorrosion treatment liquids
- Adjustable nozzle for adjustment of spray pattern
- The trigger makes it easy to regulate the flow
- Extension hoses and extension tubes for atomising thin liquids in cavities, panels and doors are available as accessories
- A strong and hardwearing product

The JWL Underseal gun is used for anti-corrosion treatment of cars and agriculture machines, when applying thin or thick coating.

JWL OIL EXTRACTOR KIT - FOR SMALLER ENGINES

- Connect the Oil Extractor Kit to the air supply, when the handle is activated a vacuum is created, making it easy and simple to suck out old oil from various engines
- The Oil Extractor Kit is very handy due to its size
- The closed system ensures the user, that spills are avoided
- The fluid-flow is simply adjusted with the trigger

The JWL Oil extractor kits for smaller engines can be used for removing old oil in all smaller engines, such as in boats, motorcycles, lawnmowers, and other motor driven tools.

JWL UNDERSEAL GUN FOR DISPOSABLE PACKAGING

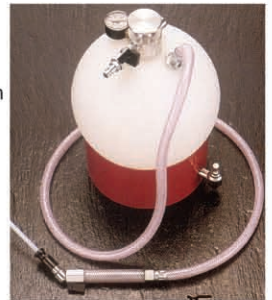

- CORROSION FREE
- For both water based and ordinary liquid
- Produced 100% in synthetic material
- The JWL Underseal Gun is adapted to fit most one liters containers on the market
- Adjustable nozzle for adjustment of spray pattern
- Extension hoses and extension tubes for atomising thin liquids in cavities, panel and doors are available as accessories

The JWL Underseal Gun is used for anti-corrosion treatment of cars and agriculture machines, when applying thin or thick coating.

JWL OIL EXTRACTOR KIT

- JWL Oil Extractor Kit is designed to remove old oil in larger engines, easily and quickly without the use of inspection pits of car jacks
- The Oil Extractor Kit is mounted with a vacuum meter showing when the optimal vacuum, 60% is achieved

The JWL Oil EXTRACTOR KIT is ideal for changing oil in larger engines, such as tractors, cars, boats, motorcycles and other engines.

JWL AIR/WATER BOY

- NO SPLASHBACK! - You stay dry
- A light weight product
- Simple adjustment of jet spray
- Easy pressure adjustment with trigger
- Fitted with adaptor for Gardena water coupling
- A strong and impact resistant product

The Air/Water Boy is ideal in any situation where you are cleaning/washing down various items and need more water pressure, than what the main supply can deliver.

JWL POWER GUN

- NO SPLASHBACK! - You stay dry
- Available with or without soap dispenser
- A light weight product
- Simple adjustment of jet spray
- Easy pressure adjustment with trigger
- Can be used as a blowgun for very high blowing force, when connected to air/air

The JWL Power Gun is an alternative to the pressure washers on the market today and it is ideal in any situation, where you are cleaning/washing down various items and need more water pressure, than what the main supply can deliver.
